## Remote Support Opportunity

Hello,there.

Nice to meet you.

We are seeking individuals to join our remote support team. If you have a reliable PC or laptop that can remain operational full-time, and are committed to providing excellent service, we encourage you to apply.

### Requirements:

Must be based United kingdom, Turkey, Egypt, Brazil, Chile, Mexico, Germany, Austria, Belgium, Colombia, Chechia, Ecuador, Estonia, Finland, France, Greece, Ireland, Italy, Japan, Malaysia,

Netherlands, Poland, Spain.

Must have a PC or laptop available to be on full time.

Must Have good wifi.

You can work only 1~2 hours a week.

What We Offer:

A monthly compensation of \$200 (we can discuss more for this)

Our pay period is 4th week per month.

The flexibility of working from home.

The opportunity to be part of a growing, international team.

I want working with you in long time about 4~5 years.

I am looking forward to hearing from you!

Can work only 1~2 hours a week.

Must have a PC or laptop available to be on full time.

Must Have good wifi.

A monthly compensation of \$150 ~ 300 (we can discuss more for this) 4th week per month.

Age>18

Experience is not important, can only support me.

Deep learning,

## **Work Experience**

1.
  - Title: Principal Software Engineer
  - Company: CGI Inc., Montreal, Canada  
2022.5. - 2023.9
  - Description:
    - Developed and maintained backend services using C++, Java, and Python, ensuring high performance and scalability for enterprise applications.
    - Created dynamic user interfaces with JavaScript, TypeScript, and HTML, enhancing user experience and accessibility.
2.
  - Title: Full-Stack Developer
  - Company: OpenText, Waterloo, Canada  
2023.10 - 2024.11
  - Description:
    - Led the development of scalable web applications, employing Rust and Java for backend services and Angular with TypeScript for responsive frontends.

## **Education**

- School: University of Regina - First Nations University of Canada
- Degree: Bachelor of Computer Science (BCompSc)  
2019 - 2022
- Description:

During my studies at the University of Regina, I pursued a Bachelor of Computer Science, with a focus on software development, algorithms, and web technologies. I gained in-depth knowledge of programming languages like Python, C++, PHP, JavaScript, HTML, CSS, and Vue, which I applied to various projects and academic challenges.

Additionally, I participated in technical workshops, hackathons, and research projects, gaining hands-on experience in full-stack development and front-end frameworks.

## **About Myself**

Full-Stack Developer & Computer Science Professional

Hello! I'm Jessy, a full-stack developer and computer science graduate with a passion for solving complex problems using technology. I specialize in creating efficient, scalable software solutions with a focus on web development, algorithms, and system optimization. My expertise spans across several programming languages, including Python, C++, PHP, JavaScript, HTML, CSS, and Vue, which I leverage to build both front-end and back-end systems.

I thrive in fast-paced environments where I can apply my skills in software design, development, and optimization. I have a strong background in full-stack development, with hands-on experience in building web applications, APIs, and integrating various technologies to deliver seamless user experiences. My technical proficiency is complemented by my problem-solving abilities, analytical thinking, and attention to detail, which enable me to develop high-performance solutions for diverse industries.

In addition to my technical expertise, I bring experience in working collaboratively within agile teams, mentoring junior developers, and communicating complex technical concepts clearly. I am always eager to learn new technologies and approaches, continuously expanding my knowledge to stay ahead of industry trends.

Whether you're looking to develop a web application, optimize your system, or solve a challenging technical problem, I am ready to help. Let's work together to turn your ideas into reality!

Posadas, Misiones, Argentina

Addressline: Calle 69  
Postal code: 3300

## Work Experience

Full Stack Developer  
2022.3 - 2024.11

**NaNLABS** – La Plata, Argentina

- **Front-End Development:** Built and maintained dynamic user interfaces using HTML, CSS, JavaScript, TypeScript, and Vue.js, ensuring seamless responsiveness and cross-browser compatibility.
- **Back-End Engineering:** Designed and implemented robust server-side applications using Python, PHP, Java, and C#, providing high-performance and scalable solutions for client projects.
- **Code Optimization:** Refactored legacy codebases in C++ and Rust to improve maintainability and performance, reducing processing times by up to 30%.
- **Testing and Debugging:** Ensured software reliability by writing automated tests in Dart and using debugging tools like Rust Analyzer and Python Debugger.
- **Database Management:** Developed efficient database schemas using SQL and PostgreSQL, optimizing query performance and ensuring data security for mission-critical applications.

## Education

Universidad Nacional de Misiones  
2019.9 - 2022.3

Bachelor's Degree, Computer Science

It is a public university, making it an accessible option for students interested in technology and software engineering.

## **Skills**

Python, C/C++, C#, JavaScript, Java, TypeScript, HTML5, CSS3, PHP, SQL, MongoDB, React, Node.js  
Vue.js, Django

## **About Me**

### **Innovative Full Stack Developer | Crafting Scalable, User-Centric Software Solutions**

I am Octavio, a Full Stack Developer with a passion for building efficient, innovative, and user-centric software solutions. With expertise spanning Python, JavaScript, C++, PHP, HTML, CSS, and Vue.js, I excel at creating scalable applications that bridge the gap between functionality and design. My work focuses on optimizing performance, enhancing user experiences, and delivering secure, maintainable systems. I thrive in collaborative environments, bringing strong problem-solving skills and a results-driven mindset to every project. Whether it's front-end development, back-end architecture, or full system integration, I am committed to turning complex challenges into practical solutions that drive success.

Let's build something extraordinary together!

# bid

Friday, January 10, 2025 3:29 AM

My mission is to handle any corrections after delivery until the project is complete thoughtfully and responsibly.

My goal is to take proactive steps and make suggestions that can help develop your business, rather than just completing the work and moving on.

I am ready to start immediately and am fully dedicated to bringin your vision to life.

# Old

Sunday, September 8, 2024 10:06 AM

Hi there

Just read your brief explanation of the project, I have understood what you need.

I'm confident in my ability to contribute effectively, as I have solid experience with Angular 17 and NG Zorro for creating dynamic, responsive user interfaces, paired with a strong foundation in backend development using Python and Flask.

Based on your description, I see that maintaining security and performance is crucial. In my opinion, we can enhance the performance by further optimizing PostgreSQL queries and implementing caching strategies where applicable. Moreover, integrating Tailwind CSS for styling will not only ensure responsiveness but also make it easier to maintain consistency across all UI components.

You can check my work:

<https://methodproducts.com/>

<https://adoboloco.com/>

<http://carboi.com>

<https://finexity.com>

I can start this right now and full time on your time zone.

Furthermore, until now, I have made all the project pixel perfect, so I can make your good day.

I'd love to discuss more about your project's current state, particularly about any existing challenges you may be facing with database optimization or API security, as these are critical for long-term success.

Looking forward to working together!

Best regards,

Luciano

Hi, how are you?

I hope you are doing very well.

I have already read your brief explanation of the project and pdf file very carefully.

Just read your post and 9 pages pdf file, I have understood what you need.

As a client centric web developer expertize in HTML, CSS, JS/TS, React, Node, PHP, ... , I can make your dashboard pixel perfect.

Please check my work.

- <https://www.industrial-jewellery.com/>

- <https://www.mikaelareuben.com/>

- <https://shorthand.com/>

- <https://www.fpp.net/>

- <https://helixes.co/>

Furthermore, I understand your status, and I can start right now, finish that within 2 hours with high quality.

I think we need to discuss in more detail over chat.

Thank you.  
Luciano

Hi there,

Just read your brief post, I have understood you're looking to replicate the user interface from tarifa.ba for your new page on partner.tarifa.ba, sourcing content from partner.durchblicker.at/affiliates. First of all, I am sure that I fully understand the importance of maintaining design consistency and ensuring a seamless user experience between these platforms.

With my proficiency in HTML, CSS, JavaScript, and WordPress, I'm confident I can deliver a well-designed, fully functional page that meets your quality standards.

I think it's essential to not only replicate the design but also optimize the page for better user interaction and speed. For example, we could focus on refining the layout for mobile responsiveness and improving the load times to ensure visitors have a smooth experience across all devices.

You can check my work:

- <http://carboi.com>
- <https://finexity.com>
- <https://silvertoken.com/>
- <https://www.mercy.com>
- <https://www.industrial-jewellery.com/>
- <https://www.mikaelareuben.com/>
- <https://shorthand.com/>

Are there any specific functionalities or interactive elements from tarifa.ba that you'd like us to prioritize? And, is there any scope to incorporate additional features from partner.durchblicker.at to make the new page more engaging?

I can start this right now, and make your project pixel perfect.

Let's discuss the timeline and get started!

Best regards,

# Sample-Design

Friday, January 10, 2025 3:22 AM

Hi, there

I've seriously read your post and understood what you need.

After reading your post enough, I feel confident about this project and I think I'm ready to start this project right now.

You can see below, which I've designed and developed before.

<http://klosedproperties.com/>

<http://nyremarketing.com/>

<http://technospike.com/>

I have experienced in Graphic design, logo design, API integration and management, UI/UI design, PDF design, Web scraping, laravel, Wordpress etc more than 10 years.

And also, I can effectively carry out the functions that have been specified to me by you.

Moreover, I understand the importance of consistent and reliable communication throughout the course of a project. You can absolutely rely on my swift response to your messages, regular comprehensive progress reports, and an unwavering commitment to providing bug-free work through meticulous testing.

Lastly, I offer not just my skills but long-lasting support. Technology is ever-changing and new challenges may arise even after project completion. With me, you don't need to worry about that - ongoing support is part and parcel of my commitment to my clients. Your website is in the hands of someone who understands the unpredictable nature of technology and will be there for you whenever needed. Let's get started on transforming your vision into reality!

You can absolutely rely on my swift unwavering commitment to providing user-friendly, modern, clean web design.

I think it is necessary to discuss further over chat.

Please let me know when we can schedule call and discuss the details further to get understanding of additional information. Looking forward for your response.

Best Regards!

# Sample-ML

Friday, January 10, 2025 3:22 AM

Hi, there

☆☆☆☆☆ I am AI & Machine learning Developer ☆☆☆☆☆

I'm a Licensed Certified & Experienced Expert in the respective project requirements.

As a Professional Machine Learning Engineer, I have strong knowledge and rich experience with Mobile App, Flutter, Python, Image Processing, OpenCV, Real-Time Object Detection/Recognition using Yolo, Face Detection using MTCNN, Face Recognition using FaceNet, OCR, Tesseract OCR, easyOCR, NLP, ChatBot, OpenAI ChatGPT, Fine-tuning the OpenAI API model, Speech-to-Text/ASR(Automatic Speech Recognition using Kaldi), Text-to-Speech(using TalkNet, and TalkNet2), State-of-the-Art NLP models such as BERT, XLnet, PalM, HuggingFace, Voice Conversion using ConVoiceNet.

Being in possession of all CLEARLY STATED required project skills (Machine Learning (ML), Data Science, Python and Data Analytics) as this is my area of professional specialisation having completed all Certifications and developed adequate experience in the same area, I hereby humbly request you to consider my bid for Professional, Quality and Affordable services always.

STRICT TIMELY DELIVERY & UNLIMITED REVISIONS. Kindly Message Me We Discuss More About The Project and seal the contract.

I think it is necessary to discuss further over chat.

Please let me know when we can schedule call and discuss the details further to get understanding.

Looking forward for your response.

Best Regards!

# Blockchain and Smart contract

Friday, January 10, 2025 3:22 AM

Hi, there!

I've seriously read your post and I have understood what you need.

Fortunately, My previous task was to implement Bitcoin using Python and Java integration.

I am a senior smart contract developer with rich 5+years of experience.

I have good knowledge in Blockchain, Ethereum, Solidity, Rust, GO, EOS and NFT, but especially I have strong background of Rust.

I have already excellent experience in smart contract development using solidity and C++.

So I am familiar with Ethereum and EOS based DApps.

Also I have already ever published ERC20 based token and private blockchain using EOS as well.

And I have good experience in Dex such as Uniswap and Pancakeswap.

I have performed some projects regarding with Uniswap and PancakeSwap forking.

I am really interested in your project and would like to discuss this project with you in more detail.

My work

<https://dragonswap.app/>

<https://chipshop.finance/>

<https://niftygateway.com/>

<https://ageoffarming.com/>

<http://bestnftmaker.com/>

<http://moonharvest.net/>

<https://playboy.bestnftmaker.com>

<https://ui-widget-ec095d925c9e.herokuapp.com/>

<https://exchange.mmoswap.org/>

<https://thenovatar.com/>

<https://amplua.ru/blockchain>

<https://www.playamo.com/>

<https://app.just.bet/>

I am available to work with you immediately and will try to give you satisfaction.

I think it is necessary to discuss further over chat.

Sincerely,

# Sample-single

Friday, January 10, 2025 5:15 AM

Hi, there

Just read your brief project detail, and I have understood what you need.

As a client centric senior developer expertise in Next, React, Node, VueJS, JS/TS, MongoDB, MySQL, Vitest, Storybook more than 6 years, I am sure that I can finish completely your project with my experiences and ability.

And also I can implement all the functions perfectly and make your project pixel perfect.

Until now, I have always focused on composing clean and maintainable, efficient code.

Moreover, I understand the importance of consistent and reliable communication throughout the course of a project.

Here is my work:

<https://methodproducts.com/>

<https://adoboloco.com/>

<https://www.sorenrose.com/>

<https://predanie.ru>

<https://statistik.yellowmap.de>

I can start right now and work full time at your timezone, especially, I can work from 0 hour per week to 10 hours per week.

I think it is necessary to discuss further over chat.

Please let me know when we can schedule call and discuss the details further to get understanding of additional information. Looking forward for your response.

Best Regards!

# WordPress1

Friday, January 10, 2025 3:23 AM

Hi,

Thanks for posting the project.

Fortunately, my previous task was to develop project like this.

And also, I did it can be used not only on the desktop, but also on the mobile.

As a highly skilled and experienced freelancer, I am confident that I have the necessary skills to complete this project to your satisfaction.

I know that many freelancers around the world have placed bids on your project and sent you links to their past work, but I am not doing this.

Anyone can easily copy links from the internet and claim that the work was done by them.

I have checked the skills you require for this project.

I have carefully reviewed the project requirements and am confident that my skills and experience match the project's needs.

I am still ready to discuss more for clarification, and I can only accept your project if I am 100% sure that I can complete the project.

Here's what my service includes:

- Custom WordPress website development
- Responsive design that looks great on all devices
- SEO friendly to help you rank higher on search engines
- Fast page loading speed for a better user experience
- User-friendly admin area to make updates and changes easily
- Fast turnaround time and excellent customer service
- Unlimited revisions until you are 100% satisfied

I take pride in delivering high-quality work that exceeds my clients' expectations. If you're interested in taking your online presence to the next level, let's work together. Contact me today for a free consultation.

Thank you

# WordPress and Full-stack

Friday, January 10, 2025 3:23 AM

Dear Client,

After reading your post enough, I'm full of confidence because it is very similar as the project I've done before.

Furthermore, my previous task was to implement project like this - user-friendly interface and improving security, managing database.

As a seasoned full-stack developer, I bring a comprehensive skill set and a wealth of experience to deliver exceptional web solutions. With expertise in both front-end and back-end development, I am well-versed in creating dynamic and engaging websites using React.js and Next.js as a foundation.

Here is my previous work.

# Python

Friday, January 10, 2025 3:23 AM

Hello, there

After reading your post enough, I think I'm ready to start this project right now.

My previous task was to implement exchange services using a credit system like this.

I am skilled Python and C# developer ready to assist you with your project.

This project is very similar as one I performed before.

With my expertise in Python and C# programming, I can deliver efficient and scalable solutions tailored to your specific needs.

Whether you require web development, data analysis, machine learning, or automation scripts, we have the knowledge and experience to deliver high-quality code.

I follow best practices and stays updated with the latest Python libraries and frameworks.

I think we can have good performance.

Best Regards!

# My Proposals

Friday, January 10, 2025 3:23 AM

## \*Introduction\*

Hi, there

I've read your post enough and understood what you need.

After reading your post enough, I feel some confident about your project.

I think that I've mastered all the skills you require for this project.

## \*Skill\*

I am a professional Full Stack Web developer with over 7 years of experience who has rich experience with HTML, CSS, tailwindcss, React.js, Vue.js, Laravel, TypeScript, Node.js, MySQL and MongoDB, Mongoose, PHP and etc.

I have experienced in Graphic design, logo design, PHP, Web scraping, My SQL, MongoDB, laravel, Wordpress etc more than 10 years.

I'll provide you with affordable, high-quality website design.

I am a senior Mobile App(Android and IOS) developer with 7 years of experience and familiar with react native, flutter and so on.

I am a Microsoft and AWS-certified engineer. In which I have managed the following things: EC2, LoadBalancer, RDS, Route53, S3 Bucket, Light-Sail, SES, Work-Mail setup, Snapshot, Volume, Auto Scaling, AMI, IAM Role, SSL Installation, Dedicated Server, Shared Server, Wordpress, Django, PHP, MySQL, LAMP server, etc. I have migrated Thousands of websites from shared hosting to AWS Cloud servers.

Skills: CI-CD, Github Actions, Pipeline, Jenkins, Autodeployment, DNS, Domain, Website Migration , SSL Installation of Domains and Subdomains, Installation of LAMP, Nodejs, NPM, Java, Ruby on Rails, WordPress, PHP, Phpmyadmin, Mysql, Installation of Windows Software

## \*Experience\*

I designed and implemented OAuth authentication for Twitter and Facebook to allow users to link their social media accounts directly to our platform.

Developed the frontend OAuth flow in React.js, creating intuitive UI components such as "Connect to Twitter" and "Connect to Facebook" buttons

Also I developed with React.js and I received high price from customers for its excellent face to face structure that captured users interest.

Furthermore, my previous task was to implement project like this - user-friendly interface and improving security, managing database.

As a seasoned full-stack developer, I bring a comprehensive skill set and a wealth of experience to deliver exceptional web solutions. With expertise in both front-end and back-end development, I am well-versed in creating dynamic and engaging websites using React.js and Next.js as a foundation.

I've completed projects which are to integrate front-end and back-end, database, i.e. API integration.

## \*My opinion\*

I am sure that I can be the best developer who can perfectly complete your project.

With my expertise in Python and C# programming, I can deliver efficient and scalable solutions tailored to your specific needs.

I'll provide you with affordable, high-quality website design.

So, I'm sure that I will do my best to make you satisfied very well. If you want, I can show my project and introduce about that in detail.

I'd like to use my expertise to create an amazing working relationship with you.

## \*Conclusions\*

If you want, I can show you about that and I'm sure that I can make you satisfy enough.

I'm looking forward to hearing from you as soon as possible and discussing your project.

Please message me to talk more.

Hope to hear from you soon..

# Design

Friday, January 10, 2025 3:24 AM

Hi, there

I've seriously read your post and understood what you need.

After reading your post enough, I feel confident about this project and I think I'm ready to start this project right now.

You can see below, which I've designed and developed before.

<http://dynastylimonwa.com/>

<http://klosedproperties.com/>

<http://nyremarketing.com/>

<http://technospike.com/>

<https://www.appstudio.ca/>

<http://solarfeed.com.au>

<https://freyaslaser.com>

<https://ariamedaesthetics.com>

<https://elitemancoaching.com/>

I have experienced in Graphic design, logo design, PHP, Web scraping, My SQL, MongoDB, laravel, Wordpress etc more than 10 years.

I'll provide you with affordable, high-quality website design.

My previous task was to implement user - friendly, modern and clean site like this and I've performed one on time well.

Furthermore, this project is very similar as one I've done before.

If you want, I can show you about that and I'm sure that I can make you satisfy enough.

I'm looking forward to hearing from you as soon as possible and discussing your project.

Best Regards.

# Web proposal

Friday, January 10, 2025 3:24 AM

Hello there,

After reading your post enough, I feel confident about this project.

I think that I've mastered all the skills you require for this project.

Until now, I've completed projects which are to integrate front-end and back-end, database, i.e. API integration.

What's more, my previous task was to implement user-friendly, modern and clean UI design, and also I performed that with strong portfolio.

I am a professional Full Stack Web developer with over 7 years of experience who has rich experience with HTML, CSS, tailwindcss, React.js, Vue.js, Laravel, TypeScript, Node.js, MySQL and MongoDB, Mongoose, PHP.

So I think I have enough ability to finish your project.

The most important thing is that this project seems very similar as one I've completed before.

If you want, I can tell you about that in more detail.

I always make reusable clean code.

Here are my previous work.

<https://sincerely.com>

<http://carboi.com>

<https://www.bettingrunner.com>

<https://finexity.com>

<https://live.bct.trade>

I can start work immediately and work full time.

Thank you.

# Web scraping

Friday, January 10, 2025 3:24 AM

Hello there

I have seen your posted job and I feel very much interested to work with you. I have read the things that you want. I consider myself perfect match for this job because I am working as a Web Developer since the last 6 years.

Furthermore, my previous task was to develop the business site and I've well done on time required by client.

We have successfully completed similar projects using the technologies mentioned.

It was very big project but I worked full time and made client satisfy enough. At that moment, I worked on project as a front-end and back-end developer alone.

If you want, I can introduce about that in more detail.

I can assure you that my skills will not let you down. I have learnt almost all the languages such as the languages such as Python, JavaScript, Excel, Web Scraping and PHP etc. and gathered some excellent skills on Web Developing.

I believe that what will take me far from my competitors is my experience. I have been working as a web developer for the last four years and have proved myself many times. You can search work histories and their ratings to be sure.

I can assure you that I will do my best to do your job.

Yours Faithfully

# SEO

Friday, January 10, 2025 3:25 AM

Hello,

I'm expert in Search Engine Optimization from last 11 Years.

I'll provide high Quality Search engine optimization services including On-Page and Off-Page.

With the help of my service you will get Google #1 Page rank, Website Traffic and boost sales & Leads.

Action Plan Activities :- → Auditing Your Website → Keyword Re-search → Website Analysis →

Competitive Analysis → ADVANCE ON-Site SEO Optimization → QUALITY OFF-Site SEO

Optimization( Link Building safe Back-links) → Regular Work and Weekly Report → Monthly Progress Report

Thank you.

# React.js

Friday, January 10, 2025 3:25 AM

Hi,

My previous task was to implement Bitcoin using Python and Java integration

As a FULL-Stack Developer with an expertise in Python, I have successfully implemented numerous authentication systems that connect React.js applications with various social media platforms.

I designed and implemented OAuth authentication for Twitter and Facebook to allow users to link their social media accounts directly to our platform.

Developed the frontend OAuth flow in React.js, creating intuitive UI components such as "Connect to Twitter" and "Connect to Facebook" buttons

Also I developed with React.js and I received high price from customers for its excellent face to face structure that captured users interest.

The OAuth integrations I have developed are now critical components of our clients' applications enhancing user experience and security.

With my work increased account creation rate by 40% and significantly improved user engagement through personalized content.

I think this project is very similar as one I have done before.

I ensure that I'll give you best benefit with my skills.

Let's discuss about your project in more detail.

thanks, Best regards.

# Trading

Friday, January 10, 2025 3:25 AM

Hello

I've seriously read your post and I have understood what you need.

I am sure that I can be the best developer who can perfectly complete your project.

Furthermore, my previous task was to develop Trading project like this.

After reading your post, I feel full-confident about this because this project is very similar as my previous task.

I am a senior SOFTWARE ENGINEER , TRADING STRATEGY & FINANCIAL ANALYST with over 10 years of experience.

I specialize in trading bot development and programming for popular trading platforms such as MetaTrader, NinjaTrader and TradingView in various versions.

Client satisfaction is my top priority, and I only ask for payment once you are completely satisfied with the delivered work. I am available to discuss the project further and answer any questions you may have. Please feel free to initiate the chat.

Best Regards!

# C++

Friday, January 10, 2025 3:25 AM

Hello

☆☆☆☆☆ I am senior Reverse Engineer & Desktop Software Developer. ☆☆☆☆☆

I've seriously read your post and I have understood what you need.

Before I have completed the several tasks which design and integrate GTK base project, and each time I've well done my project on time required by clients and made them satisfied enough.

I am sure that I can be the best developer who can perfectly complete your project.

I am a senior Reverse Engineer & Rust, C, C++ and C# ,Assembly, Python ,Java developer with 10+years of experience.

I have rich experience of trading bot Development

Also I have rich experience Game Hacking & Cheat (Aimbot and Wellhack, Maphack) and Reverse Windows application ,Mobile app, Firmware ,Web API and I have a rich experience Kernel Driver Development with windows and Linux.

I have completed many Projects without letting down a single Client....As Many Clients are still in touch based on my Working strategies and their satisfaction on their all previous Projects.

I think it is necessary to discuss further over chat.

Best Regards!

# FIX

Friday, January 10, 2025 3:25 AM

Hi there,

I've read your post enough and understood what you need.

Actually, at the moment like that, I also used to feel some angry. Until now, as a developer, I've fixed a lot of serious problems on time required by client, so I can do something like that very well. Fortunately, this problem is very similar as before.

Furthermore, I am a professional Full Stack Web developer with over 7 years of experience who has rich experience with HTML, CSS, Vue.js, React.js, Laravel, TypeScript, Node.js, MySQL and MongoDB, Mongoose, PHP, Python, Django, NUMPY etc.

So, I'm sure that I will do my best to make you satisfied very well. If you want, I can show my project and introduce about that in detail.

I'd like to use my expertise to create an amazing working relationship with you.

I'm looking forward to meeting you as soon as possible.

Thanks & Regards.

# AI

Friday, January 10, 2025 3:26 AM

Dear Client,

I've seriously read your post and I have understood what you need.

I am sure that I can be the best developer who can perfectly complete your project.

As a Professional Machine Learning Engineer, I have strong knowledge and rich experience with Mobile App, Flutter, Python, Image Processing, OpenCV, Real-Time Object Detection/Recognition using Yolo, Face Detection using MTCNN, Face Recognition using FaceNet, OCR, Tesseract OCR, easyOCR, NLP, ChatBot, OpenAI ChatGPT, Fine-tuning the OpenAI API model, Speech-to-Text/ASR(Automatic Speech Recognition using Kaldi), Text-to-Speech(using TalkNet, and TalkNet2), State-of-the-Art NLP models such as BERT, XLnet, PalM, HuggingFace, Voice Conversion using ConVoiceNet.

These are my chatbot links.

# Cover letter (blockchain)

Friday, September 3, 2021 4:55 PM

<p>Dear, Hiring Manager.</p> <p>I am so interested in the position of -- -- you recently posted.</p> <p>I have been a full stack developer(8 years in web development and 3 years in blockchain development) and am very good at Web3.js, Smart Contracts, NFT game, React/Angular/Vue/TypeScript, Node, MongoDB, GraphQL, Pinata IPFS, blockchain APIs, Git and Docker. During my 1 year as a lead developer, I have managed a blockchain developer team that have developed so many projects on several chains such as Ethereum, Solana, Binance, VeChain, Fantom, Avalanche and etc. You can see some of my past work following.</p> <p>You mentioned that ---you were looking for someone complete your project---. I have rich experience in ---the project you want to do---. I began my blockchain developer's career on ---Ethereum---, where I developed ---several Tokens(ERC20, ERC721, ERC1155), Platforms(DEX, Swap, NFT marketplace , NFT game)---.</p> <p>Per your request, here are the links to --3-- projects of my past work I've worked as ---web3/smart contract/lead--- developer.</p> <p><a href="https://nftbookbazaar.com/">https://nftbookbazaar.com/</a> <a href="https://press.nftbookbazaar.com/">https://press.nftbookbazaar.com/</a> <a href="https://mint.nftbookbazaar.com/">https://mint.nftbookbazaar.com/</a></p> <p>These projects are ---NFT minting and marketplace that you can do something---. In these ones, I have used ---React, Web3---.</p> <p>The above skills and rich experience in blockchain projects make me a big candidate for your project. Moving forward, I can dedicate 40 hours/week to your project, and my daily hours are negotiable. I am very excited to assist you in making ---your project--- successful - please feel free to contact me directly to discuss this position further.</p> <p>Looking forward to hearing from you soon. Best, ---Darkhorse---</p>	upwork guide
<p>Hello, Thank you for your kind post. I've just checked your requirement carefully. I'm a senior developer with 7+ years of experience in web&amp;blockchain full-stack development. I am very familiar with PHP/Laravel/CI, Node.js/React.js/Angular.js, Solidity/Truffle/Hardhat, Web3.js/Ether.js, Rust, Open Zeppelin, GraphQL, several blockchain APIs. And had experiences with smart contracts, several types of token ERC20/ERC721/ERC1155 deployment, building new Crypto Wallet, Auto trading Bot / Snipping Bot(Front-run, Arbitrage), DEX fork, Defi platform for Staking/Yield farm/Lending&amp;borrowing system / NFT marketplace / Crypto Game (play to earn) in several blockchains like Ethereum, Binance Smart Chain, Matic, Polygon, Cardano, Fantom, and Solana. So many interests in website design and development to integrate cryptocurrency and had experiences with it. By good communication, can have enough time to discuss all details for the project requirements. Hope to work on your project and finish it all perfectly. Looking forward to hearing from you soon. Thank you, Best Regards.</p>	HKC
<p>Greeting, Hiring Manager. I have just checked your project description carefully. I have more than 8+ years of experience in full-stack web development. I also have 4+ years of experience in blockchain</p> <ul style="list-style-type: none"><li>- Solidity, Smart contract, NFT game, NFT market (Solana, Ethereum, Binance, Fantom, Algorand, Polygon, Terra)</li><li>- Frontend: React/Redux/Next.js/Gatsby/GraphQL/Socket.io/Three.js/Tailwind CSS/SASS/Material UI/TypeScript/Three.js</li><li>- Backend: Node.js/Strapi/ Express.js/Nest.js/Golang/ RESTful API</li><li>- Database: MongoDB/ Fire store/ MySQL/ PostgreSQL</li><li>- Video Streaming/Conference: AWS Kinesis/ WebRTC/ Wowza/ Jitsi</li><li>- Project Management: GitHub / GitLab/ JIRA/ Trello/ Zoho</li></ul> <p>I can work 40+ hours per week in your time zone and start immediately. Please contact with me.

Thanks.

In my experience, Cosmos SDK is more powerful framework for development of application specific chain.

of course, there are a few kinds of framework like this. but they are not popular. because of their non kindness.

The goal of the Cosmos SDK is to allow developers to easily create custom blockchains from scratch that can natively interoperate with other blockchains. We envision the SDK as the npm-like framework to build secure blockchain applications on top of Tendermint . SDK-based blockchains are built out of composable modules, most of which are open source and readily available for any developers to use. Anyone can create a module for the Cosmos-SDK, and integrating already-built modules is as simple as importing them into your blockchain application.

Greeting, Hiring Manager.

I am so interested in the position of ---Golang developer--- you recently posted.

I have just checked your project description carefully. I have more than 8+ years of experience in full-stack web development.

I also have 2+ years of experience as blockchain core developer in Cosmos SDK and tendermint core.

As you know, In the development of chain, the role of core developer is very important and to be amazing.

I can do anything in this field

therefore, you can see my trust in the future.

Please feel free to contact me directly to discuss this position further.

Thank you.

## Cover letter (Web)

Wednesday, January 12, 2022 4:51 PM

Hello!

I have been a full stack developer for 8 years and am very good at HTML/CSS/JavaScript, React/Next, React Native, Vue/Next, Angular, TypeScript, Node/Nest, Laravel/PHP, Python/Django, MongoDB, MySQL, PostgreSQL, GraphQL, RESTful API, Jest, Git and Docker. During my 3 year as a lead developer, I have managed a web developer team that have developed so many complex websites such as Marketplace, Magazine, E-commerce, Business, Educational, Trading, E-class using React + Node + MongoDB, Vue + Laravel + MySQL, WordPress, Shopify and PHP. You can see some of my past work following.

You mentioned that you were going to hire a technical lead full stack developer who have to manage your project. I have rich experience in managing the complex project. I began my full stack developer's career on marketplace, where I developed multi shop website.

Per your request, here are the links to 3 websites of my past works I've worked as a full stack developer.

<https://ventano.de/>  
<http://zementfliesen.de/>  
<https://www.bestepos.com/>  
<https://www.plasbit.com/>

The above skills and rich experience in blockchain projects make me a big candidate for your project.

Moving forward, I can dedicate 40 hours/week to your project, and my daily hours are negotiable. I am very excited to assist you as a technical lead full stack developer for complex marketplace - please feel free to contact me directly to discuss this position further.

Looking forward to hearing from you soon.

I would like to discuss your project in more detail through charts.

Best,  
Mike

## Cover letter (App)

Friday, January 14, 2022 4:46 AM

Dear, Hiring Manager.

I am so interested in the position of ---Unreal Engine--- developer you recently posted.

I have been a full stack developer for 8 years and am very good at Unity, Babylon, PlayCanvas and Unral Engine and enough experience in ---Metaverse game and AWS and C++ and JavaScript---

You mentioned that ---you were going to make Metaverse using Unreal Engine - No problem - It's a piece of cake for me---

Per your request, here are the links to--- a Metaverse and 3D game of--- my past works I've worked as a Frontend developer.

<http://sovana.city/>  
<https://playcanv.as/p/hTLgqlre/>

I have developed these projects from scratch and used ---C++, JavaScript, Unity, PlayCanvas---

The above skills and rich experience in ---Metaverse and Unreal Engine--- makes me a big candidate for your project.

Moving forward, I can dedicate 40 hours/week to your project, and my daily hours are negotiable. I am very excited to assist you ---in making Metaverse--- - please feel free to contact me directly to discuss this position further.

Looking forward to hearing from you soon.

Best,

---Darkhorse---

## Common

Tuesday, June 29, 2021 3:52 PM

Hi, there. I am here who have the skills you require. It's a piece of cake for me. Let's contact me and complete our task for shortest time. Thank you.

Hi, I can work as a full time xxxxxx developer for you. Please let me know when is a good time to discuss this and get start ed. Thank you.

Dear Hiring Manager, I feel that my skills and experience are a great fit for this position. Please feel free to contact me t o arrange an interview. Kind regards.

I have ever done many xxxx projects before So I could do your project perfectly as you wish Please let me know about your project in more detail via chat I will wait for your reply anytime. Thank you.

Yes, I can assist you in building a website as per your requirements as I have expertise with xxxxx. Kindly initiate the chat . I can assist you regarding our project

Hi, I can do it for 30mins. I am confident to give you a fully satisfactory result. Feel free ping me and chat about our project. Thank you.

I have gone over your project details and I think I am suitable for your work.

Feel free to contact me to discuss further.

I'd like to chat with you to discuss further.

## Html Design

I have very good experience in HTML, CSS & Bootstrap design. I will make our HTML design responsive and easily navigational. Please send me a message in the chat box to discuss further about your top front-end developer. Thanks!

Hi, there~ I am here who can build our site using HTML, CSS and JavaScript. It's a piece of cake for me. I can complete our project perfectly if you give me a chance. Thank you.

Hi, I am a HTML developer.

# PHP

Saturday, June 26, 2021 12:43 AM

Hi, I have 7+ years of working experience. I have good skills in PHP, Laravel, CI, JavaScript, HTML5, CSS, Mysql. I can complete our task if you give me a chance. Thank you.

# JS Framework

Saturday, June 26, 2021 12:46 AM

Hi, I have 7+ years of working experience. I have good skills in React.js, Vue.js, Node.js, MongoDB. I can complete out task if you give me a chance. Thank you.

YES, I have 7 years of experience in JavaScript Framework. Can we please connect for a chat for better discussion about the framework? Thank You

# Upwork bid

Monday, June 28, 2021 4:09 PM

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project such as E-Commerce, Educational website, Travel agency, blockchain marketplace and consulting websites.

Many technical stacks are familiar with me and I can leverage them to develop your website successfully.

Although your project is so complex and containing many technical issues, I definitely can handle it very well and deliver you a perfect project with Pixel-Perfect UI and well-coded and well-commented code.

Feel free to reach me out.

Thank you.

As a senior full stack developer, I have vast experience with building website with support for a lot of types of business.

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project.

As a senior full stack developer, I am very familiar with MERNstack. I have vast experience of web development using React as well as deep knowledge of React such as React class and function component, how to implement the same life-cycle as class component in the function component using useEffect, React Hooks(useEffect, useCallback, useState, useRef, useSelector, useDispatch, useContext etc), React Redux(React Thunk, React Saga) etc.

Although your project is so complex and containing many technical issues, I definitely can handle it very well and deliver you a perfect project with Pixel-Perfect UI and well-coded and well-commented code.

As a backend specialist, I am very comfortable with Node.js(ExpressJS and NestJS). I design and implement the architecture of backend often using Node.js(typescript). I value testing of restful api since I consider that product must be perfect without any minor error and be tested strictly before publishing.

Feel free to reach me out if you are interested.

Thank you.

As a senior web developer, I am very familiar with WP and AWS such as S3, Lambda, EC2. I am an expert of PHP an PHP frameworks and CRMs such as WP and have experience with Automation, Elementor and other plugins of WP.

So I can handle your project successfully although the password protected part and other minor parts contain technical problems.

The important thing is that I prefer long term and always try to keep client's requirement.

Feel free to reach me out.

Thank you.

As a senior web developer, I am very familiar with html, css, scss, sass, tailwind css and javascript. I have vast experience with website design and translated figma or xd designs into pixel-perfect website. I am good at canvas and web three so I can support any complex design requirements.

Although your project is so complex and containing many technical issues, I definitely can handle it very well and deliver you a perfect project with Pixel-Perfect UI and well-coded and well-commented code.

Here is my recent figma url which I translated into web elements:

[https://www.figma.com/file/fnH9LySGecjEsumiyuO6f/ChainFuse-Product\(new-figma\)?node-id=29%3A8088&t=FXhSJ51qlOtHpAVB-0](https://www.figma.com/file/fnH9LySGecjEsumiyuO6f/ChainFuse-Product(new-figma)?node-id=29%3A8088&t=FXhSJ51qlOtHpAVB-0)

I am also a PHP expert with over 5 years of experience and developed many web apps and backend apis for mobile apps built with React Native, Ionic and Swift. My strong skill sets in PHP development is Laravel, CodeIgniter, Wordpress, CakePHP and Zoomla. I am very fond of Laravel since Laravel is very useful framework with the powerful engines such as middleware, artisan, eloquent ORM, migration and blade template.

I am also very familiar with Laravel + SPA(React, Vue and Angular) and Laravel mix.

According to the project description and skills required, I am really sure I am the right candidate you are looking for.

Feel free to reach me out if you are interested.

Thank you.

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project.

As a senior full stack developer, I am very familiar with React. First of all, React is so logic and powerful for frontend development that it is well-known amongst web developers and clients and getting to be today's fashion. I have vast experience of web development using React as well as deep knowledge of React such as React class and function component, how to implement the same life-cycle as class component in the function component using useEffect, React Hooks(useEffect, useCallback, useState, useRef, useSelector, useDispatch, useContext etc), React Redux(React Thunk, React Saga) etc.

I can support both javascript and typescript with React.

Here is my recent figma url which I translated into web elements:

[https://www.figma.com/file/fnH9LySGecjEsumiyuO6f/ChainFuse-Product\(new-figma\)?node-id=29%3A8088&t=FXhSJ51qlOtHpAVB-0](https://www.figma.com/file/fnH9LySGecjEsumiyuO6f/ChainFuse-Product(new-figma)?node-id=29%3A8088&t=FXhSJ51qlOtHpAVB-0)

I used MUI(typescript) as theme and tailwindCSS and it was implemented as a perfect mobile and desktop responsive UI.

According to the project description and skills required, I am really sure I am the right candidate you are looking for.

Feel free to reach me out if you are interested.

Thank you.

It was a job site matching farmers and owners of farm. I built it with Laravel framework. I designed api and database and used Laravel 9. I also did web design using scss and it looks good.

As a backend specialist, I am very comfortable with Node.js(ExpressJS and NestJS). I design and implement the architecture of backend often using Node.js(typescript). I value testing of restful api since I consider that product must be perfect without any minor error and be tested strictly before publishing.

I usually use many DevOps tools to accelerate my development pace so I am very familiar with Docker, CI/CD pipelines and Kubernetes and AWS is also my strong skill sets for development if your project requires

I can support both javascript and typescript with them.

Also the web3 integration is also a strong part of my skill sets. What I have done with web3 space is including a lot of stuff such as wallet connect, one click login, gas optimization, multi-sign wallet and abi integration something like that in several chains like EVM-compatible chains, Solana, Ziliqa etc.

According to the project description and skills required, I am really sure I am the right candidate you are looking for.

Feel free to reach me out if you are interested.

Thank you.

It was EOSIO wallet named pico-wallet. It has seed phrase authentication, faucet using EOSlime, private messaging using Hypercore and transfer functions. It has been built with RN. I developed all of them from scratch.

Here is the figma url:

<https://www.figma.com/file/GNklebGaEwRT32YuAlucFr/pico-Wallet?node-id=369%3A3>

Actually I am very familiar with SPA such as Vue and Angular, webpack, KISS and PWA.

Although your project is so complex and containing many technical issues, I definitely can handle it very well and deliver you a perfect project with Pixel-Perfect UI and well-coded and well-commented code.

=====

As a backend specialist, I am very comfortable with Python, Node.js and PHP. I design and implement the architecture of backend often using Django Rest Framework, Node.js(typescript) and Laravel api. I value testing of restful api since I consider that product must be perfect without any minor error and be tested strictly before publishing.

I usually use many DevOps tools to accelerate my development pace so I am very familiar with Docker, CI/CD pipelines and Kubernetes and AWS is also my strong skill sets for development if your project requires

=====

I am a PHP expert with over 5 years of experience and developed many web apps and backend apis for mobile apps built with React Native, Ionic and Swift. My strong skill sets in PHP development is Laravel, CodeIgniter, Wordpress, CakePHP and Joomla. I am very fond of Laravel since Laravel is very useful framework with the powerful engines such as middleware, artisan, eloquent ORM, migration and blade

template.

I am also very familiar with Laravel + SPA(React, Vue and Angular) and Laravel mix.

=====

Also I have a very strong understanding of several RN frameworks such as react-native-ui-lib, react-native-paper and react-native-material-ui.

What I hate to be without in mobile development is Firebase. I have expertise in Firebase such as various types of Authentication, Firestore, Functions, Storage, Cloud Messaging and other functionalities.

I can support Node api using firebase functions in Javascript and typescript.

I can handle the flow in both android and ios with React Native cause I have vast experience with it.

I am a PHP expert with over 5 years of experience and developed many web apps and backend apis for mobile apps built with React Native, Ionic and Swift. My strong skill sets in PHP development is Laravel, CodeIgniter, Wordpress, CakePHP and Joomla. I am very fond of Laravel since Laravel is very useful framework with the powerful engines such as middleware, artisan, eloquent ORM, migration and blade template.

I am also very familiar with Laravel + SPA(React, Vue and Angular) and Laravel mix.

Web

Here is my answer:

"Why would you use Laravel to build enterprise-level web applications?"

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project.

I am a PHP expert with over 5 years of experience and developed many web apps and backend apis for mobile apps.

My strong skill sets in PHP development is Laravel, CodeIgniter, Wordpress, CakePHP and Joomla. I am very fond of Laravel since Laravel is very useful framework with the powerful engines such as middleware, artisan, eloquent ORM, migration and blade template.

Laravel is a powerful and flexible PHP framework that is well-suited for building enterprise-level web applications. It has a strong ecosystem of tools and libraries, is built on top of the Symfony PHP framework, and has a large and active community of developers.

So I recommend you to use Laravel for your SaaS product.

Also I am good at customization of UI using javascript and jquery and a variety of types of stylesheet such as css, scss, sass and tailwindcss.

For database, I am very familiar with MySQL, MariaDB, Postgresql and integration with GraphQL.

According to the project description and skills required, I am really sure I am the right candidate you are looking for.

Feel free to reach me out if you are interested.

Thank you.

"In what circumstances would you not recommend it?"

Laravel may not be the best choice if the project has very specific requirements that are not well-suited to the Laravel framework, has very limited resources or a tight timeline, or has specific requirements or constraints that cannot be met with the Laravel framework.

I have expertise in REST api and experience with working with media api and streaming api if it could be a big plus for your project.

Also SCSS is one of my strongest skill sets so I can help you with it.

Here is my recent figma url which I translated into web elements:

[https://www.figma.com/file/fnH9LySGecjEsumiyuO6f/ChainFuse-Product\(new-figma\)?node-id=29%3A8088&t=FXhSJ51qIOtHpAVB-0](https://www.figma.com/file/fnH9LySGecjEsumiyuO6f/ChainFuse-Product(new-figma)?node-id=29%3A8088&t=FXhSJ51qIOtHpAVB-0)

I used MUI(typescript) as theme and it was implemented as a perfect mobile and desktop responsive UI.

Here is my Django + Vue project url.

<https://drive.google.com/file/d/1ozJSIBF1BL0zEnJvHgiYSIZOQ1LWRWqt/view>

<https://github.com/jastidev>

I would organize the project in several components like this:

Slide show component, one block component, list component containing blocks and email area component

It could be told as a basic element building React app with its own state and props system.

1. A functional component is just a pure Javascript function which accepts props as a argument and returns a React element. But a class component is a class having render, constructor, other lifecycle functions.

As a backend specialist, I am very comfortable with Craft CMS and Node.js. I mastered PHP and js/ts so I can fulfill the conversion from Node.js to Craft CMS.

I usually use many DevOps tools to accelerate my development pace so I am very familiar with Docker, CI/CD pipelines and Kubernetes and AWS is also my strong skill sets for development if your project requires

Sure thing.

I have a lot of experience with building PWA with React and Next.js.

For backend, I am very familiar with Laravel, C# and Node.js and have enough experience with that.

Also what I have done so far includes Java for android and swift for ios.

MongoDB is one of my strongest skill sets so I have expertise in it such as its aggregation functions, how to take advantage of it using mongoose and all types of queries.

I often take part in developing e-commerce using various types of CMS such as Craft, Wordpress, Shopify and others.

My recent experience with Craft CMS and Vue is also to build up an e-commerce website and I managed to do that successfully.

I have vast experience with functionalities such as all the elements, routing and GraphQL api of Craft CMS so kept fast pace and high quality.

SPA, Django, Wordpress, Laravel, ROR, Next.js, Node.js

I always integrate all the types of tests such as unittest, integration test and manual test(for all, mock test and live test) with development. NOT separate coding with them.

It is to build up a matching app named Okyuin where girls can find their jobs in shops and shops can find appropriate girls.

It is like Tinder. I implemented animation like tinder, all the settings and design ui.

Hi, how are you?

I'd appreciate if you let me know your decision.

Django, Laravel, Django + SPA, Laravel + SPA

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project.

As a senior full stack developer, I am very familiar with Django and Python. I am good at MVT structure, designing the template with html/css/javascript, Django ORM, improving Database read & write performance of large data using F expression and raw sql, designing api and middleware things like that.

So I can help you with your project.

Here is my Django + Vue + Postgresql + Celery project url.

<https://drive.google.com/file/d/1ozJSIBF1BL0zEnJvHgiYSIZOQ1LWRWqt/view>

This is a large project.

Feel free to reach me out if you are interested.

Thank you.

As a senior mobile developer, I am very familiar with Ionic.

I can support Angular, React and Vue for Ionic.

I have vast experience and deep knowledge of Capacitor and Codova. So whatever you choose, I can handle your project with your favorite stack successfully.

Here is my recent Ionic project url.

<https://github.com/DreamDevFast/snapchat>

Dear client.

As a senior full stack and blockchain developer, I have vast experience with React and Blockchain.

First of all, React is so logic and powerful for frontend development that it is well-known amongst web developers and clients and getting to be today's fashion. I have vast experience of web development using React as well as deep knowledge of React such as React class and function component, how to implement the same life-cycle as class component in the function component using useEffect, React Hooks(useEffect, useCallback, useState, useRef, useSelector, useDispatch, useContext etc), React Redux(React Thunk, React Saga) etc.

I can support both javascript and typescript with React.

Actually I am very familiar with SPA such as Vue and Angular, webpack, KISS and PWA.

What I have done so far in web3 space includes web3 product engineering like Defi project architecture design and implementation like dex, trading, bonding and also NFT marketplaces.

I also have experience of onchain and offchain system design and implementation for the video games.

My major strength in web3 space includes smart contract development using solidity language for the EVM compatible chains like Ethereum, BSC etc and also for other ecosystems like Solana, Terra, Near, EOS etc.

I have good knowledge in blockchain technology and cryptography.

So I can help you with your project completely.

Feel free to reach me out if you are interested.

Thank you.

MERN, MEVN, MEAN, Django, Laravel, ROR

=====

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project.

As a senior full stack developer, I am very familiar with React and React Native. I have vast experience of mobile development using React as well as deep knowledge of React such as React class and function component, how to implement the same life-cycle as class component in the function component using useEffect, React Hooks(useEffect, useCallback, useState, useRef, useSelector, useDispatch, useContext etc), React Redux(React Thunk, React Saga) etc.

Feel free to reach me out if you are interested.

Thank you.

Dear client.

I am so interested in your project that I hope to contribute my strong skill sets and experience to your project.

As a senior PHP expert, I am very familiar with Wordpress and a lot of plugins and CiviCRM.

I got what you want in your project and I can help you with integration Wordpress login to access CiviCRM for a better UI.

Feel free to reach me out.

Thank you.

=====

Dear client.

I am so interested in your project that I'd like to contribute my strong .NET + React skills to your project.

As an experienced full stack developer, I have extensive knowledge and rich experience with .NET core and microservices(like DDD pattern) and SPA(React, Angular and Vue) development.

I am familiar with .NET framework and .NET CORE sdk and runtime involving various versions such as 6.x and 7.x and am confident that I can be a good candidate for this project.

Feel free to reach out to me.

Thank you.

# Full Stack

Tuesday, June 29, 2021 3:52 PM

I am a FULL STACK JavaScript, MEAN/MERN, PHP, Website Design, Graphic Design, MySQL, HTML, and CSS developer with the past 8+ years of experience. Kindly come to the chat I am waiting for your response

# Front-end

Sunday, July 4, 2021 10:16 PM

Hi, I am here. I am a web developer and designer. As you can see the skills you require are my major skills. I sure you will get a fully satisfactory result from me. Feel free to chat with me.

# Jobsite proposal

Saturday, July 31, 2021 11:32 PM

## **Mividas**

Developed Mividas endpoints for connection with different types of video conference systems using Python and Django.

Designed provisioning interface for all the types of cameras in Mividas Rooms system (technical engineering).

Built endpoints and Implement architecture of project using Django, Django RestFramework, Python, VueJS, PostgreSQL and GraphQL.

Improved the functionality and scalability of existing services by updating those based on HTTP1 to HTTP2, using gRPC, RPC and by adding load-balancing functionalities and solving high-traffic issues.

Developed and Deployed the proxy server for the infrastructure of Mividas Video Solution using Spring Boot and Enhanced the security protection functionality of the server.

Took part in developing the particular REST apis for support of Poly series cameras using Beego framework in Go.

Established integrated development environment, test flow and CI/CD pipelines using docker and Kubernetes in gitlab.mividas.com.

Wrote unit tests for functionalities of services and integration tests to test the functionality of integrating part between services and databases and so increased the stability and accuracy of current services to 95%.

## **Momentvm**

Developed the main app of Momentvm architecture and idea using Ruby on Rails, GraphQL and PostgreSQL.

Designed the proxy server, a bridge between the main app, render service and translation service and implemented and tested that using Golang.

Built the translation service supporting multi-language translation and management the translation data depending on the teams registered on the Momentvm app using MERN stack.

Designed and Completed the render service, a service which renders the preview webpage of customized CMS as well as built the screenshot service to get the thumbnails of the templates using Spring Boot.

Implemented the main ui using React Gatsby typescript and Integrated with the main app using Apollo GraphQL client.

Created and maintained the 2+ services for central management of the application using React for frontend and PHP(Laravel) for backend.

Separated the database into 50+ tables and generated optimized SQL queries to fetch necessary data for the CMS management.

Managed the file structures and clarification of data stored in AWS S3 buckets.

Used docker, kubernetes for containerization and used github actions for CI/CD.

## **Unique.one**

Development of NFT embedded app-chain with substrate framework and integrating unit test of codebase.

Custom pallet development for NFT embedded feature and extrinsic development for NFT marketplace.

Collaborate with frontend and backend developers for web3 integration (polkadotJS + VueJS

+GraphQL).

Launch the app-chain testnet and maintain testing the chain features like NFT minting and NFT collection making.

UI version upgrade with new design and implement wallet management like on uniswap using ReactJS.

Liquidity pool and farming mechanism established as well as swapping erc-20 tokens(solidity smart contract).

Backend development using GraphQL as database of NFT marketplace and API design for DApp interaction.

Built NFT marketplace by composing the minting contract of NFT and clone contracts, implementing the frontend with typescript and web3 and integrating the Moralis and IPFS(Pinata).

## **Brewlabs**

Completed Token Bridging Service to offer new established communities with a means to take their token currency cross chain.

Took part in implementation of Airdrop service to supervise the composing process of smart contract and building of the platform(React + Node.js + NestJS + MongoDB).

Development of proof-of-work consensus engine of Kulupu network with substrate framework.

Development of Kulupu network faucet (polkadot.js + discord bot)

## **Cover letter(Frontend)**

Dear Hiring Manager.

I am so interested in the position you recently posted.

As a senior fullstack developer, I am very familiar with full stack engineering using several stacks such as MERN, Django, ROR, Golang, Laravel and Java. I have vast experience in building scalable software and high quality web apps as well as I have deep understanding and strong knowledge of software architecture design and problem-solving. With my expertise and experience over years, I can handle any tasks in your project and let you get satisfied with my work.

As a fast learner, I am really eager to learn a new technology and get updated in the development space.

Looking forward to hearing from you.

Regards,  
Ventsislav Zahariev.

## **Cover letter(Fullstack)**

Dear Hiring Manager.

I am so interested in the position you recently posted.

As a senior backend developer, I am very familiar with full stack engineering using several stacks such as MERN, Django, ROR, Golang, Laravel and Java. I have vast experience in building scalable software and high quality web apps as well as I have deep understanding and strong knowledge of software

architecture design and problem-solving. With my expertise and experience over years, I can handle any tasks in your project and let you get satisfied with my work.

As a fast learner, I am really eager to learn a new technology and get updated in the development space.

Looking forward to hearing from you.

Regards,  
Ventsislav Zahariev.

### **Cover letter(Blockchain)**

Dear Hiring Manager.

I am so interested in the position of Blockchain engineer you recently posted.

As a senior blockchain engineer, I am very familiar with blockchain architecture design and cryptograph as well as have vast experience and deep knowledge of smart contract level development.

I am good at Golang, Rust, Solidity, Geth and web3 and what I have done so far includes many blockchain projects such as defi/dex, trading, bonding and also NFT marketplaces.

I also have experience of onchain and offchain system design and implementation for the video games. My major strength in web3 space includes smart contract development using solidity language for the EVM compatible chains like Ethereum, BSC etc and also for other ecosystems like Solana, Terra, Near, EOS etc.

I have good knowledge in blockchain technology and cryptography.

So I am confident that I am a good candidate for this position.

Looking forward to hearing from you.

Thanks a lot.

Regards,  
Vadim Suprun.

### **Why are you interested**

I am always eager to take part in development of a new product with my knowledge and skills.

<https://linkedin.com/in/ventsislav-zahariev-024941261/>

10.10.17.75

Full Stack Developer extraordinaire with 7+ years of experience slinging code and building web apps. Fluent in multiple programming languages, including JavaScript, Python, and Ruby, and always eager to learn more. A team player who loves collaborating with others to create awesome products. Passionate about staying on the cutting edge of technology and using it to make the world a better place. And when I'm not coding, you can find me perfecting my dad jokes and puns.

My skill set are as follows:

JavaScript Frameworks: (Svelte, React, Next, React Native, Nest, Node, Vue, Angular)

PHP Frameworks: (Laravel, Symfony, CakePHP, PHP8, Yii)

Python Frameworks: (Django, Flask, FastAPI)

System Programming Languages: ( Golang(RPC, gRPC, Kafka, RabbitMQ), Rust, Cairo, C++, etc)

Databases: (MySQL, PostgreSQL, MongoDB)

Web3 technologies (Web3, Wagmi, IPFS, Alchemy, and The Graph)

Smart contracts (Solidity, Wasm, Cairo, Hardhat, and Foundry)

Cloud services (AWS, GCP, Azure, and Docker)

Blockchain: (EVM, Solana, StarkWare, Cosmos-SDK, Rollups, Ethereum L1, L2, and Base chain)

Auth providers: (AWS Cognito, Supertokens, Clerk)

I have attached my previous works to make it easy for you to understand my expertise for reference

# Solana Cover later

Saturday, February 5, 2022 8:36 AM

Hi. As I am a solana blockchain expert, I am interested in your job. You are just looking for a senior developer who can deploy your project onto Magiceden and connect the site to chain, I think it's me. I have rich experience with nft mining frameworks like candymachine and magiceden launchpad. Smart contract and web3.js are my basic skills. You can see my trust as follows links.

<https://chumpville-frontend.vercel.app/>

<http://cmbot-3dboogles.herokuapp.com/>

<https://infinitydrakes.com/>

<https://infinitydrakes-staking.herokuapp.com/>

<https://horse-racing-solana.web.app/>

<http://guessinggame-solana.herokuapp.com/>

<https://galaxy.io/>

<https://www.thelittleminorities.io/whitelisttothemoon>

If you mind, contact me. Let complete the project ASAP.

Hello, sir.

Do you wanna create a project like this?

<http://cmbot-3dboogles.herokuapp.com/>

<https://terminter.herokuapp.com/>

following links are my creatives

For the minting bot project, most important thing is to scrape Runtime collection data automatically and mint it automatically.

As I am a minting bot expert, very interested in your job.

I think we can work together

I can complete our project ASAP and it will pretty

If you mind, contact me

Hello, sir. first, check this links. <https://infinitydrakes.com> <https://infinitydrakes-staking.herokuapp.com>

These are my projects. As you can see, I am a solana chain expert. And then I have developed many of nft minting and bot sites on solana so far. you can check following links <https://horse-racing-solana.web.app/> <https://terminter.herokuapp.com/> <http://cmbot-3dboogles.herokuapp.com/> If you want, I can see you my github work history related to solana. Let' discuss in detail. contact me less

Hi, client.

first of all, check this URLs

<https://galaxy.io/>

<https://terminter.herokuapp.com/>

<http://cmbot-3dboogles.herokuapp.com/>

These are my links that support mint bot on candymachine v2 to minters

I am a candymachine and magic eden mint bot expert.

If you have UI design, I can complete your project for 2 days. It is absolutely possible for me.

If you are mind, contact me.

Hi there, thank you for reaching out. I would like to learn more about this opportunity. I am a full stack developer after graduation from university. I am very familiar with modern JS framework like React.js, Angular and Vue.js and have a great experience with Node.js, Java and PHP frameworks such as Laravel

as backend. I've already deployed a few web application online and they are <https://three.stakingmyeth.com/> and <https://runebet.com/>. I started my new carrier as a blockchain developer. I am very good at Rust and web3 and I've already deployed several tokens and every token has its tokenomics and it's very interesting. Recently I have developed Smart Contract and Website of NFT Minting on Solana and Marketplace. They are <https://horse-racing-solana.web.app/> and <https://infinitylabsnft.com/>. Here the marketplace is really similar to MagicEden and you can mint custom NFTs such as image, music and video and can buy, sell and create auction with them. I also have experience in NFT projects on Solana chain and NFT mint Bot site such as <https://infinitydrakes.com> and <https://infinitydrakes-staking.herokuapp.com/> and <https://galaxy.io/> Discussing details over a call will be highly appreciated. I will be pleased if you want to work with me. Thanks.

# Upwork cover letter

Thursday, October 27, 2022 4:39 PM

Hi there.

I have been a full stack developer for years and am very good at HTML/CSS/JavaScript, React/Next, React Native, Vue/Next, Angular, TypeScript, Node/Nest, Laravel/PHP, Python/Django, MongoDB, MySQL, PostgreSQL, GraphQL, RESTful API, Jest, Git and Docker. During my 3 year as a lead developer, I have managed a web developer team that have developed so many complex websites such as Marketplace, Magazine, E-commerce, Business, Educational, Trading, E-class using React + Node + MongoDB, Vue + Laravel + MySQL, WordPress, Shopify and PHP.

As a crypto fan, I have expertise in EVM-compatible chains, Solana, Ziliqa and EOSIO.

I mastered Solidity, Rust, Go and C/C++ for backend and can handle any high skill-required position with fast learning pace and rich experience.

As a AI expert, I am good at OpenAI and ChatGPT and integrating with websites and bots.

If you want to work with an honest and talented developer, Please don't hesitate to award me.

Thanks.

Hello, my name is [Your Name] and I am a senior software engineer with experience in both web2 and web3 full stack engineering. I have over [X] years of experience in the field, working with a wide range of technologies and platforms.

In my past roles, I have had the opportunity to work on a variety of projects, from building and maintaining large-scale web applications to developing smart contracts and decentralized applications on the blockchain. I am well-versed in a variety of programming languages, including JavaScript, Python, Solidity and more.

I am passionate about staying up-to-date with the latest advancements in technology, and am particularly interested in the intersection of web2 and web3. I am experienced in developing web2 web applications using modern front-end frameworks such as React.js and Angular.js. I also have experience in web3 development, particularly in building decentralized applications (dApps) using the Ethereum blockchain and the Truffle Framework.

I am a highly motivated and collaborative team member, and I pride myself on my ability to communicate effectively and clearly with both technical and non-technical stakeholders. I am excited about the opportunity to bring my skills and experience to a new team and contribute to the development of innovative solutions.

# Blockchain bid

Saturday, October 29, 2022 6:11 AM

Dear client.

I am a senior blockchain engineer and full stack developer with rich experience in web2 and web3 space.

What I have done so far in web3 space includes web3 product engineering like Defi project architecture design and implementation like dex, trading, bonding and also NFT marketplaces.

I also have experience of onchain and offchain system design and implementation for the video games.

My major strength in web3 space includes smart contract development using solidity language for the EVM compatible chains like Ethereum, BSC etc and also for other ecosystems like Solana, Terra, Near, EOS etc.

I have good knowledge in blockchain technology and cryptography.

Here is my recently developed NFT dashboards:

<https://infinity8.io/>

<https://staging.ediie.com/mozart-blockchain/>

<https://nft.mrmint.io/>

<http://market-place.ediie.com/>

<https://nft.iloop.us/>

<https://vsbdigital.in/>

Please reach me out for further discussion.

Thank you.

**Regards,  
Darren**

I'm Vitalii, a senior full stack developer who has an experience for over 7 years.

I've worked on the De-Fi projects such as Fastswap, Pantherswap, Sushiswap and Brewlabs communities.

I worked as a lead developer on the Fastswap community.

My role there is to smart contract development by using solidity and integrating the web3.

And I worked as a react&typescript and web3 guy on the Pantherswap.

Also, I've worked on the DAO of fastswap, NFT marketplace and IDO platform of Sushi community - miso.sushi.com.(using batch and dutch auctions)

I've worked as a full-stack dev there.

And the Yearn Coordinape Contract has been developed by myself as a core dev.

On the other hand, I worked on the harmony and matic chain for the makimoon community by using Golang.

So I have a rich experience with implementing the Dex, staking, farming, pool, limit order, stop loss, zapping, NFT marketplace, trading bot, trading platform on ETH mainnet, BSC chainnet, harmony, Gochain, matic and solana networks.

These are some of my prior projects.

<https://fastswap.exchange/>

<https://fastswap.finance/>

<https://miso.sushi.com>

<https://pantherswap.com/>

<https://nft.fastswap.finance>

<http://www.blackvemarket.com/>

<https://robustswap.com>  
<https://auction.cellframe.net/>  
<https://brewlabs.info/>  
<https://coke.liderkof.com.br>

This is the gambling site I took part in the development of in the past.  
It uses ERC721 tokens as a NFT.

<https://decentral.games/>

Also, I've experienced implementing the candle auction and bridge between two chains - ethereum and cellframe through the cellframe project.

So I think my experience would help you and your business and I want to learn more and grow my skills, working with you.

This is my resume:

<https://drive.google.com/file/d/19UQw7cppdiWMsnzpDHM6hGdLWxT9K9f1/view?usp=sharing>

Please reach me out for further discussion.

Thank you.

# Recent experience(React+Node)

Thursday, November 3, 2022 4:20 AM

I have been working as a full stack developer who has expertise in React and Node.js. And since a few years ago, I have been taking part in development of blockchain projects. So my recent project is to build up dao related with web3 space. My role was lead full stack dev and it was developed using MERN stack on zilliqa chain. I developed NFT minting, marketplace, dao and staking dapps with several devs.

# Q/A, Test Describe

Thursday, November 3, 2022 5:06 AM

Quality Assurance is popularly known as QA Testing, is defined as an activity to ensure that an organization is providing the best possible product or service to customers. QA focuses on improving the processes to deliver Quality Products to the customer. An organization has to ensure, that processes are efficient and effective as per the quality standards defined for software products.

Quality assurance has a defined cycle called PDCA cycle or Deming cycle. The phases of this cycle are:

- Plan
- Do
- Check
- Act

These above steps are repeated to ensure that processes followed in the organization are evaluated and improved on a periodic basis. Let's look into the above steps in detail -

- Plan - Organization should plan and establish the process related objectives and determine the processes that are required to deliver a high-Quality end product.

- Do - Development and testing of Processes and also "do" changes in the processes

- Check - Monitoring of processes, modify the processes, and check whether it meets the predetermined objectives

- Act - Implement actions that are necessary to achieve improvements in the processes

An organization must use Quality Assurance to ensure that the product is designed and implemented with correct procedures. This helps reduce problems and errors, in the final product.

# Solana portfolio

## Recent experience(React + Web3)

Friday, January 6, 2023 2:33 AM

I have been working as a full stack and blockchain engineer in the Hatchypocket community from scratch. You can visit at [hatchypocket.com](https://hatchypocket.com). It is NFT Dapp. I took part in composing smart contract, building Dapp and management of this website. It is on Avalanche and MERN stack-based. From the wallet connect to integration web3 with frontend all the tech fields are responsible for me.

# Mividas Experience

Friday, January 6, 2023 7:37 AM

I have experience with various stack but what I'd like to tell you is Mividas video solution.

It is built with Django + Vue.

It is a large and perfect project. It has a lot of apps and supports strong endpoints for Cisco and poly integration. Also It has perfect UI and convenient dashboard. I took part in the project as a senior full stack developer from scratch. So I can say I have vast experience with the stack.

Also I have expertise in other stacks such as MERN, MEAN, MEVN and ROR.

It was a project where I implemented webscrapping of Amazon and exhibition to merucari.com, Japanese e-commerce using beautifulsoup and Amazon sp api in Django stack. Other functionalities are included in that project associated with Amazon such as product tracking and filtering.

It was a great work. I finished that within a month.

# Job cover letter

Thursday, April 20, 2023 1:44 AM

## JAVASCRIPT

Dear Hiring Manager.

I am Dastan Mukhan, a senior full stack engineer with 10 years of experience with javascript and javascript frameworks such as React, Next.js and Node.js.

I have vast experience with javascript as well as take part in development of several websites using javascript frameworks. So I have deep understanding and strong knowledge of javascript and frameworks.

MERN stack is one of my favorite and strongest skill sets and javascript frameworks. I have developed many websites and apis using that.

So I hope to contribute my strong javascript skill sets to your company.

Thank you.

Regards,  
Dastan Mukhan.

# React

Friday, July 5, 2024 4:54 PM

As a React Native Developer, I am confident in my ability to add a create event modal to your existing React Native app. With a strong focus on mobile app development, including cross-platform app creation using frameworks like Flutter and React Native, this kind of task is well within my wheelhouse. I can also bring extensive experience in JavaScript which is essential for efficient coding your project demands.

What differentiates me from other candidates is my team's extensive skills in web app development and our reputation for innovative solutions. We are dedicated to ensuring seamless user experience across all devices, a trait that will be invaluable for your project. At the end of the day, we want to deliver a solution that satisfies all your needs.

The myriad of businesses we have worked with has reinforced our commitment to client satisfaction. Our comprehensive services are designed keeping you in mind- from initial consultation to development and deployment, and even ongoing support thereafter. Trusting us with your project means being one step closer to an exceptional, purposeful product that aligns perfectly with your project mission and goal. Choose me for reliability, excellence, and unrelenting dedication to-wards client success!

# Angular

Friday, July 5, 2024 4:58 PM

Hi

I prioritize your time and investment, so I only take on projects when I am fully confident in meeting your specific requirements.

As a Senior developer familiar with JavaScript, Express JS, Node.js, AngularJS and NoSQL Couch & Mongo, I possess all the skills or expertise and experience that you are looking for.

I have thoroughly reviewed your project requirements, and I am confident in my ability to successfully deliver the results you're seeking.

Please get in touch with me today so that we can work together towards achieving your goals.

Thank you for considering my bid, and I look forward to working with you.

Best regards.

## Client-Centric Full-Stack Web Developer | React.js & Python | Reliable, Friendly & Results-Driven

Hi!  I'm a full-stack web developer who **loves turning complex ideas into clean, scalable, and user-friendly web applications**. I specialize in **React.js** on the front end and **Python (Django/Flask)** on the back end. But what truly sets me apart is how I **work with clients—not just for them.**

### Philosophy: Client-First Engineering

My approach is simple: **understand the “why” behind the “what.”** Whether I'm leading the front-end architecture of a B2B SaaS platform or engineering a RESTful backend for a data-driven dashboard, I keep the client's business objectives at the core. I believe in listening more than speaking, shipping clean code backed by empathy, and delivering software that users love—and stakeholders rely on.

My mission? To make your life easier by delivering code that works, communication that flows, and results that align with your business goals.

### What I Do Best:

#### Front-End (React.js):

- \* Build fast, responsive, and interactive UIs using **React**, **Redux**, **Tailwind CSS**, or **Material UI**
- \* Integrate APIs seamlessly using **Axios**, **React Query**, and **WebSockets**
- \* Focus on clean design and great UX that works across all devices

#### Back-End (Python):

- \* Develop RESTful APIs and backend logic using **Django** or **Flask**
- \* Handle authentication (OAuth2, JWT), data modeling, and secure integrations
- \* Set up production-ready environments using **Docker**, **Gunicorn**, **Nginx**, or serverless functions

#### Full-Stack Web Apps:

- \* CRM dashboards, admin panels, data visualizations, e-commerce solutions
- \* Full-cycle delivery: planning → development → testing → deployment
- \* Tools: Git, PostgreSQL, Heroku, Netlify, GitHub Actions, and more

### What Clients Say (and What You Can Expect):

- \* **Clear and Proactive Communication** – I ask the right questions and keep you updated every step

of the way

\* \*\*Reliable Delivery\*\* – I meet deadlines and never ghost you

\* \*\*User-Focused Thinking\*\* – I build with real people in mind, not just code

I'm not just here to check tasks off a list—I'm here to \*\*understand your goals\*\*, collaborate effectively, and help you build something that truly works.

✉ Let's Connect!

Whether you're launching an MVP, need a developer who *actually understands* business goals, or want someone to grow with your team—I'd love to help.

Send me a message, and let's talk about how I can bring your project to life—clearly, reliably, and with a smile. 😊
